

Weeds Controlled by Finale® herbicide

For Spot Application:

- Apply 2 fluid ounces per gallon of water when the weed height or diameter is less than 6 inches.
- Apply 3 fluid ounces per gallon of water when the weed height or diameter is 6 inches or greater.

For Broadcast Application:

- Apply 3 quarts per acre when the weed height or diameter is less than 6 inches.
- Apply 4 quarts per acre when the weed height or diameter is 6 inches or greater.

Broadleaf Weeds

Chickweed	London rocket
Clover	Malva (little mallow)
Common cocklebur	Marestail
Filaree	Purslane
Jimsonweed	Shepherd's purse
Kochia	Smartweed

Grasses and Sedges

Barnyardgrass	Lovegrass
Cupgrass	Shattercane
Fall panicum	Smallflower Alexandergrass
Giant foxtail	(signalgrass)
Goosegrass	Stinkgrass
Green foxtail	Windgrass
Johnsongrass (rhizome)	Yellow foxtail

For Spot Application:

- Apply 3 fluid ounces per gallon of water when the weed height or diameter is less than 6 inches.
- Apply 4 fluid ounces per gallon of water when the weed height or diameter is 6 inches or greater.

For Broadcast Application:

- Apply 4 quarts per acre when the weed height or diameter is less than 8 inches tall.
- Apply 6 quarts per acre when the weed height or diameter is 8 inches or greater.

Broadleaf Weeds

Annual sowthistle	Musk thistle
Bindweed	Nettle
Buffalobur	Nightshade
Burdock	Pennycress
Canada thistle	Pigweed, red root
Curly dock	Plantain
Dandelion	Prickly lettuce
Dogbane (hemp)	Ragweed
Field gromwell	Russian thistle
Fleabane	Tansy mustard
Goldenrod	Velvetleaf
Horsetail	Vervain
Lambsquarters	Virginia copperleaf
Leafy spurge	White heath aster
Mugwort	Wild buckwheat

(continued)

Broadleaf Weeds (continued)

Wild mustard	Wild turnip
Wild onion	Woodsorrel
Wild rose	Yellow rocket

Grasses and Sedges

Annual bluegrass	Nutsedge
Bahiagrass	Paragrass
Barley	Quackgrass
Bermudagrass	Ryegrass
Carpetgrass	Sandbur
Crabgrass	Smooth brome
Dallisgrass	Torpedograss
Downy brome	Vaseygrass
Fescue	Wheat
Guineagrass	Wild oat
Kentucky bluegrass	

Use Notes

- Use higher rates within the recommended rate range for plant sizes listed when vegetation cover is dense or when weeds are growing under stressed conditions such as drought or when average temperatures are below 50° F.
- The addition of 8.5 to 17 pounds of ammonium sulfate (spray grade) per 100 gallons of water (1 to 2% by weight) or 2 to 4 pounds of ammonium sulfate per acre may improve the level of weed control.

Where to Apply

Trimming and Edging

Finale may be used for trimming and edging landscape areas such as: around individual trees and shrubs, landscape beds, foundations, fences, driveways, paths, and parking areas; also on golf courses along cart paths, around sign and light posts, and around sand traps. For control of weeds emerging from seed, the use of **Finale** in a tank mix with preemergence herbicides is recommended. If spraying in areas adjacent to desirable plants, use a shield made of cardboard, plywood, or sheet metal while spraying to help prevent spray from contacting foliage of desirable plants. Refer to the **How to Apply** section of this labeling for appropriate application rates to control specific weeds.

Recreational and Public Areas

When applied as a spot or directed spray application, this product controls annual and perennial weeds listed on this label in areas such as: airports, commercial plants, storage and lumber yards, educational facilities, fence lines, ditch banks, dry ditches, schools, parking lots, tank farms, pumping stations, parks, other public areas, and nonfood crop areas. Refer to the **How to Apply** section of this labeling for appropriate application rates to control specific weeds.
